REPORT NO. [REDACTED]

25X1A

The following report supplements information [REDACTED]
concerning the production of Geiger counters by the Pressler A.G. in
Cursdorf, Thuringia:

1. The Geiger counters produced by the Pressler A.G. are intended to count gamma rays and hard beta rays (particles).
2. The walls are made of potassium-free glass, 0.3 mm thick, with a very thin layer of silver on the inside surface.
3. The Pressler A.G. is also producing another type of Geiger counters with small windows to permit the counting of soft beta rays and alpha rays.
